

HARSHID SONI

FULL STACK DEVELOPER & SOFTWARE ENGINEER

Phone: +91 9998891105
Email: harshidsoni01@gmail.com
Location: Kalol, Gujarat, India

[LinkedIn](#) [GitHub](#) [Portfolio](#) [LeetCode](#)

Computer Science & Engineering student and Full-Stack Developer with hands-on experience building production-grade web applications, autonomous AI workflows, and micropayment architectures. Passionate about engineering clean, optimized codebase architectures, integrating intelligent workflows, and solving complex problems with robust software engineering principles.

Skills

Languages

JavaScript (ES6+), TypeScript, Python, HTML5, CSS3

Frontend Architecture

React.js, Next.js, React Native, Tailwind CSS, Vite

Backend & Database

Node.js, Express.js, MongoDB, Redis, RESTful APIs

Developer Ecosystem

Git, GitHub, Postman, npm, Vibe Coding

AI Integration

OpenAI / Whisper, Generative AI Tools, Autonomous Agents

Achievements

Ganpat Univ Hackathon Jun 2026 Winner

Won **1st place** among competing teams by engineering innovative, production-ready software solutions under strict 24-hr constraints.

Sangam University Finalist 2026

Secured **8th place** in Rajasthan at premier national hackathon evaluating multi-state developer teams.

National Hackathons 2026

Secured **11th rank** at YCCE Nagpur. Competed in **9+ hackathons** (4+ offline, 5+ online) with verified awards.

Core Strengths

- Full Stack Web Development
- REST API Architecture
- AI Agent Integrations
- Real-Time WebSockets
- Micropayment Architectures
- Problem Solving & DSA

Education

Swaminarayan College Of Eng & Tech 2025 – 2029

Bachelor of Engineering (Computer Science & Engineering)

Bhagwati International Public School 2023 / 2025

Higher Secondary (XII - 78.00%) & Secondary (X - 85.00%)

Experience

Independent Full Stack Engineer Jan 2025 – Present

Self-Employed / Hackathon Deployments

- Designed and engineered **production-grade web applications** using React, Next.js, and Express.js with secure database state management.
- Architected **15+ optimized RESTful API endpoints** and WebSocket channels for streaming data and real-time interactions.
- Integrated **autonomous AI execution workflows** and **x402 micropayment protocols** for friction-free API monetization.
- Accelerated rapid prototyping loops within **24–48 hour constraint windows** during **9+ hackathons**, delivering verified MVPs.

Featured Engineering Projects

NexusAPI — Pay-per-Use AI Marketplace [Live](#) [GitHub](#)

- Implemented an **x402 micropayment protocol** enabling autonomous AI agents and developers to pay fractional amounts per API call.
- Engineered HTTP 402 payment challenges, signed micropayments, settlement, and cryptographic audit receipts.

Tech Stack: *Next.js • TypeScript • Express.js • x402 Protocol • AI Agents*

MF Voice Advisor — AI Mutual-Fund Advisory [Live](#) [GitHub](#)

- Architected an AI voice advisory platform utilizing **OpenAI Whisper STT**, **WebSocket streaming**, and dynamic audio pipelines.
- Integrated Google OAuth, MongoDB persistence, and automated investment report generation with responsive UI.

Tech Stack: *React.js • Vite • Express.js • TypeScript • Socket.io • MongoDB*

ShopCraft Studio — Full-Stack Web App Builder [Live](#) [GitHub](#)

- Built a rapid web application builder featuring modular JavaScript/TypeScript frontend components and Python backend services.
- Implemented modern styling engines, reusable visual components, and streamlined toolkits for rapid deployment.

Tech Stack: *React.js • TypeScript • Python • Tailwind CSS • REST APIs*

React Web Architecture — Apna College Cert. [Live](#) [GitHub](#)

- Mastered React.js fundamentals: props, hooks, event handling, modular component design, and asynchronous API integration.
- Engineered interactive web interfaces using modern state management patterns and optimized DOM re-rendering.

Tech Stack: *React.js • JavaScript (ES6+) • Modern CSS • Web APIs*
